Maghi Aravinth GT

Lead Software Engineer | Java, Spring Boot, AWS, Terraform
Coimbatore, Tamil Nadu, India | +91 87548 83361 | mahigohan@gmail.com | linkedin.com/in/maghiaravinthgt22

PROFESSIONAL SUMMARY

Lead Software Engineer with 10 years of experience building and supporting Java and Spring Boot backend systems in financial services and enterprise environments. Hands-on expertise in AWS (EKS, Batch, Lambda, SQS), Terraform infrastructure as code, Apache Kafka event-driven services, and REST APIs. Experienced in building reusable Java libraries, migrating legacy systems, and improving application resiliency through performance, disaster recovery, and chaos testing. Uses GitHub Copilot to accelerate delivery and mentors junior engineers in Agile teams.

TECHNICAL SKILLS

Languages and Frameworks: Java, Spring Boot, Spring Batch, Python, REST APIs, Microservices
Cloud and Infrastructure: AWS Batch, AWS Lambda, Amazon S3, Amazon DynamoDB, Amazon EKS, Amazon ECR, Amazon CloudWatch, AWS Systems Manager Parameter Store, Terraform
Messaging and Databases: Apache Kafka, Amazon SQS, Amazon EventBridge, Oracle, CockroachDB, GemFire
Delivery and Quality: Jenkins, Maven, Git, GitHub, Selenium, ALM Quality Center, Datadog, performance testing, chaos testing, disaster recovery testing, GitHub Copilot
Ways of Working: Agile, Scrum, Waterfall

PROFESSIONAL EXPERIENCE

Lead Software Engineer | **Fidelity Investments** | Chennai, India | Jan 2022 - Present

- Develop Java and Spring Boot applications deployed on Amazon EKS, including Kafka-based services, and contribute to migrating a legacy scheduling mechanism through production rollout.
- Design and implement resiliency improvements for backend systems, supported by performance, disaster recovery, and chaos testing.
- Build reusable Java libraries that retrieve data and perform calculations for business use cases.
- Create and deploy AWS infrastructure with Terraform for AWS Batch and Spring Batch applications.
- Redesigned and developed an AWS Batch application that processes multiple files using AWS Lambda, Amazon SQS, and related AWS services.
- Develop REST APIs for restriction-code use cases and run iterative performance tests to improve efficiency.
- Use GitHub Copilot to produce structured HTML and Markdown documentation and support code analysis and implementation.
- Mentor interns on application flows and hands-on coding tasks; participate in sprint planning, estimation, reviews, and retrospectives.

Senior Software Developer | **Renault Nissan Technology and Business Centre India** | Chennai, India | Jan 2020 - Dec 2021

- Migrated Struts-based calls to REST APIs in support of application modernisation.
- Delivered platform features end to end, including API development, testing, and deployment.
- Supported the development and operation of a platform handling more than 100,000 requests per day.
- Defined application flows, planned implementation timelines, and delivered platform code.
- Performed application performance analysis and implemented file uploads to Amazon S3 from batch jobs.

Application Development Analyst | **Accenture** | Chennai, India | Jan 2018 - Jan 2020

- Developed, enhanced, and maintained complex application modules using Java and Spring Boot.
- Administered GemFire data-management services, handled platform maintenance requests, and developed shell scripts for server configuration.
- Built Java-based Selenium automation scripts for web UI testing, validated REST and web APIs using ALM Quality Center, and tracked defects through resolution.
- Delivered application features across the full development lifecycle using the Waterfall methodology.

Associate Software Engineer | **Accenture** | Chennai, India | May 2016 - Dec 2017

- Contributed to enterprise application development and maintenance as part of a software engineering team.
- Supported feature development, testing, defect investigation, and issue resolution for reliable software releases.
- Collaborated with developers and QA team members to implement, validate, and maintain application changes.

EDUCATION

Bachelor of Engineering (B.E.), Electrical and Electronics Engineering | Sri Krishna College of Engineering and Technology | Aug 2012 - Apr 2016
